Press release

+++ Schedule online +++ Barcamp +++

Berlin, Germany – April 16, 2015 – The Big Data conference Berlin Buzzwords is publishing its complete schedule with more than 50 speakers and sessions. On Sunday, May 31, Berlin Buzzwords kicks off with a one-day barcamp, followed by a two-day conference, from May 31 till June 3, 2015 at Postbahnhof.

Schedule and Talks

The final schedule for the conference has now been published, including speaker profiles and session abstracts. The line-up reflects the latest technological novelties dealing with storing, processing and distributing of large sets of digital data and gives unique insights into the innovation of open-source software. Keynote speakers include:

Ludwine Probst - Analytics in the age of the Internet of Things

Eric Evans (Engineer for the Wikimedia Foundation) - It's All Fun And Games Until...: A Tale of Repetitive Stress Injury

The complete speaker line-up can be found on http://berlinbuzzwords.de/15/speakers. Further highlights are:

Andrew Clegg (data scientist at Etsy) – Signatures, patterns and trends: Timeseries data mining at Etsy

Georgi Knox (back end engineer at Bitly) – Scale with NSQ: a realtime distributed messaging platform

Michael Busch (architect in Search & Content at Twitter) – A complete Tweet index on Apache Lucene

Barcamp

Berlin Buzzwords 2015 features a one-day barcamp on Sunday, May 31, 2015. There will be workshops, sessions and discussions on NoSQL, Twitter Storm, Cassandra or Elasticsearch vs. Solr and many more topics. The barcamp starts off at 5 pm at Postbahnhof, Berlin. Costs for the barcamp are included in the ticket, but attendees are asked to register via http://berlinbuzzwords.de/tickets.

Daniela Bentrup (project manager Berlin Buzzwords)

"Big Data is everywhere and it's evolving: As the quantity of collected data increases at an exponential rate, more and more companies are recognizing the challenges of capturing, managing, processing and analyzing Big Data. For the sixth year running Berlin Buzzwords presents talks on search, store, scale, which range from beginner-friendly to professional level with focus on open source software projects. Berlin Buzzwords is an ideal place for developers, analysts and scientists to discuss the most recent large scale computing projects. We are excited to present you this years' schedule and speaker line up."

About Berlin Buzzwords

Berlin Buzzwords' goal is to provide a platform for developers, analysts and scientists who are involved in large scale computing projects to discuss and exchange new ideas. Topics of interest include everything related to scalable search, data-analysis in the cloud and NoSQL-databases. The conference is expecting over 600 developers, engineers and data architects and offers over 40 hours of program on four stages.

The 6th edition of Berlin Buzzwords will be held from May 31 to June 3, 2015 at [Postbahnhof](.).
